THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE  
 OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793  
 AND 794, OF THE U.S. CODE, AS AMENDED. THE TRANSMISSION OR DISSEMI-  
 NATION OF ITS CONTENTS TO AN RECIPIENT BY AN UNAUTHORIZED PERSON IS  
 PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. There was only one serum station in Latvia in 1944. It was called Serum stacija and was located at Kleista Muiža in northwest Riga. The station kept a stable of about 30 horses. The equipment was simple but adequate. About 20 to 25 people were employed. All Latvian-produced serums and vaccines for both humans and animals came from this station.
2. There was no vitamin manufacture in Latvia, although the Soviets announced in 1940 that they were building a large factory in Riga. Actually a small labora-  
 tory was established and construction was begun on a factory building.
